#### Customer Problem Statement Template:

##### Problem Statement-1

User Interface Responsiveness problem statement Template				
I am	I'm trying to	But	Because	Which makes me feel
A user accessing the food ordering app on a mobile device.	Navigate the app and place an order.	The user interface elements are not adjusting properly to my screen size.	The application's UI is not fully responsive across different devices and screen sizes.	Frustrated and discouraged from using the app.

##### Problem Statement-2

API Integration and Data Handling problem statement Template				
I am	I'm trying to	But	Because	Which makes me feel
A user looking to browse the latest menu and deals.	View real-time updates on available items and discounts.	The data displayed is often outdated or takes too long to load.	There are challenges with API integration and handling asynchronous data fetching.	.Disappointed and unsure about the reliability of the app.
